LibertyLink® GT27™ Receives Final Approval for Commercial Availability

From: Rob Robinson, CEO of Rob-See-Co

ELKHORN, Neb. (July 6, 2018) The recent approval of LibertyLink® GT27™ is positive news for U.S. farmers. This trait combination gives producers a new soybean platform option with high yield potential, excellent flexibility of herbicide programs with non-volatile chemistries for greater safety and simplicity in application and clean up. This new platform offers growers another choice in soybeans and weed control.

As an independent seed company, at Rob-See-Co we believe that additional options give our farmers the power of choice. The ability to offer more product selections means better products suited for each unique situation and in turn, more success.

We continue to build relationships with our customers by looking for simpler, more effective solutions to weed control problems, and by having products that represent the latest in technological advances. We are considering adding LibertyLink® GT27™ to our soybean lineup.

About Rob-See-Co

Rob-See-Co is an independent seed company with regional expertise, providing customers access to leading genetics and traits through the Rob-See-Co and Innotech® seed brands. Rob-See-Co works alongside its customers, building strong relationships and helping them plant the right seed for their long-term success, while keeping the process friendly, straightforward and simple. To learn more, visit www.robseeco.com.

Innotech® is a registered trademark of a Syngenta Group company. Rob-See-Co™ is a trademark of Rob-See-Co, LLC. LibertyLink is a registered trademark of Bayer. GT27 is a trademark of M.S. Technologies.
